3/8 - 7/16 peghead thickness is appropriate for Grover ukulele tuners available from Stewmac. Other tuners may require a different thickness.

Carbon fiber bar can be slotted into back of fingerboard for neck and fingerboard are square.

Hole diameter and small screw holes centers shown for Grover open back ukulele tuners.

Bolt-on hardware may be omitted and mortise and tenon joint glued.

All wood should be well quartered. Cross-hatching does not indicate grain direction.
